

# Business\_Case\_Netflix

April 22, 2024

## 0.1 NETFLIX - DATA EXPLORATION AND VISUALISATION

Problem Statement:

- Netflix stands as a global powerhouse in the realm of OTT platforms, offering a vast array of movies and shows accessible to subscribers worldwide, regardless of language barriers. However, it's not just an entertainment hub; it's a thriving business with significant turnover. Therefore, it becomes crucial to delve into data analysis to discern and forecast the content preferences of viewers. By glean insights from this analysis, Netflix can strategize effectively to enhance its growth trajectory and cater more precisely to audience preferences.

Importing the required Libraries

```
[ ]: import numpy as np
import pandas as pd
import matplotlib.pyplot as plt
import seaborn as sns
import warnings
warnings.filterwarnings('ignore')
```

```
[ ]: !pip install pandas_profiling
```

```
[ ]: from ydata_profiling import ProfileReport
```

## 1 Downloading the Netflix Dataset

```
[ ]: !wget https://d2beiqkhq929f0.cloudfront.net/public_assets/assets/000/000/940/
original/netflix.csv
```

Downloading...

From: [https://d2beiqkhq929f0.cloudfront.net/public\\_assets/assets/000/000/940/original/netflix.csv](https://d2beiqkhq929f0.cloudfront.net/public_assets/assets/000/000/940/original/netflix.csv)

To: /content/netflix.csv

100% 3.40M/3.40M [00:00<00:00, 23.9MB/s]

```
[ ]: netflix_df=pd.read_csv('netflix.csv')
print('Data Set read successfully')
```

Data Set read successfully

Analysing basic metrics of the Netflix Dataset

```
[ ]: #deep copy of the dataset
```

```
df=netflix_df.copy()
```

```
[ ]: df.shape
```

```
[ ]: (8807, 12)
```

Observation:

There are 8807 unique movie/shows altogether

```
[ ]: df.size
```

```
[ ]: 105684
```

```
[ ]: df.head()
```

```

## 5 Univariate analysis

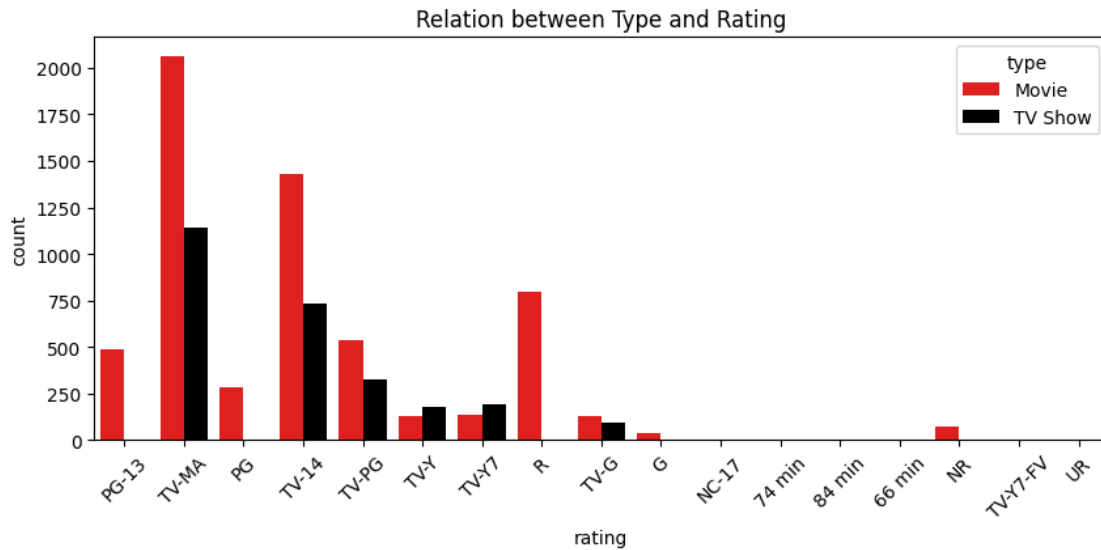

```
[ ]: color_palette={'Movie':'red','TV Show':'black'}
      plt.figure(figsize=(8,4))
      Type_Count=sns.countplot(data=df,x='type',palette=color_palette)
      plt.xticks(rotation = 45)
      plt.title('No of Movies Vs No of TV Shows')
      plt.show()
```

Observation:

More Number of movies were added in Netflix than TV shows

```
[ ]: color_palette={'Movie': 'red', 'TV Show': 'black'}  
plt.figure(figsize=(10,4))  
Type_rating=sns.  
    ↳countplot(data=netflix_df,x='rating',hue='type',palette=color_palette)  
plt.xticks(rotation = 45)  
plt.title('Relation between Type and Rating')  
plt.show()
```

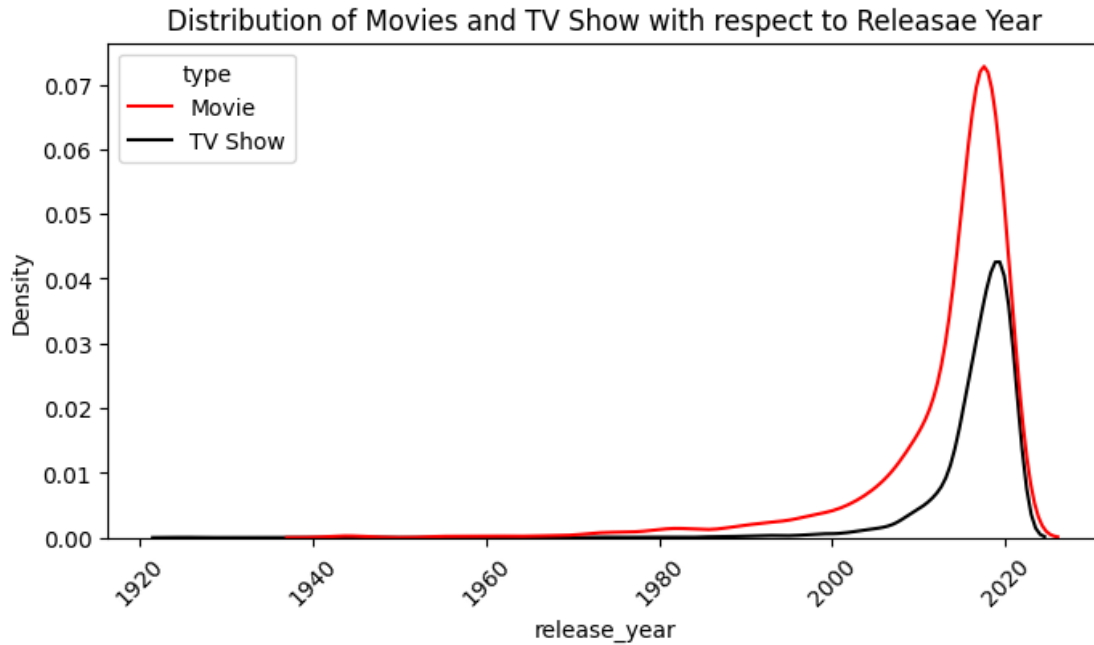

## 6 Observations:

1. By comparing the heights of the bars within each rating category, we can observe the relative frequency of each rating for movies and TV shows.
2. The color palette effectively distinguishes between movies (red) and TV shows (black), making it easy to differentiate between the two types of content.
3. The countplot reveals that the majority of ratings fall into the categories of TV-MA and TV-14
  - TV-14 - unsuitable for children under 14 years of age.
  - TV-MA - Mature Audience Only. Intended for adults and may be unsuitable for children under 17 years of age

## 7 Distribution of movies and TV\_show

```
[ ]: plt.figure(figsize=(8,4))
movie_TVshow=sns.
    ↳kdeplot(data=df,x='release_year',hue='type',palette=color_palette)
plt.xticks(rotation = 45)
plt.title('Distribution of Movies and TV Show with respect to Release Year')
plt.show()
```

## 8 Observation:

1. Movies are increasing approximately from the year 2008
2. TV\_shows are increasing approximately from the year 2012

```
[ ]: df['release_year'].unique()
```

```

## 12 Type of content is available in different countries

```
[ ]: # Group by country and count the number of movies and TV shows
content_by_country = n_df.groupby(['country', 'type']).size().
    ↪unstack(fill_value=0)

# Normalize the data (calculate proportions)
content_by_country['Total'] = content_by_country['Movie'] +
    ↪content_by_country['TV Show']
content_by_country['Movie'] /= content_by_country['Total']
content_by_country['TV Show'] /= content_by_country['Total']

# Plot the stacked bar chart
color_palette={'Movie':'red', 'TV Show':'black'}
content_by_country[['Movie', 'TV Show']].plot(kind='bar', stacked=True,
    ↪figsize=(20, 4), color=color_palette)
plt.title('Types of Content Available in Different Countries')
plt.xlabel('Country')
plt.ylabel('Proportion of Titles')
plt.xticks(rotation=90)
plt.legend(title='Type')
plt.show()
```

Observation:

The plot illustrates the distribution of movie and TV show content across different countries. Each bar represents a country, with the proportion of movies and TV shows stacked within each bar.

Observation:

The availability of content on Netflix has experienced steady growth since 2008, with a notable

surge in new releases after 2015. However, this upward trend was interrupted and experienced a decline during and after the COVID-19 pandemic.

Observation:

The top five countries contributing to content creation on Netflix, in order of prominence, are the United States, India, the United Kingdom, Canada, and France. These nations lead in generating a diverse array of titles available on the platform, highlighting their significant roles in shaping the

global landscape of Netflix content.

plt.show()
```

Observation:

The majority of content available on Netflix is geared towards mature audiences, featuring R-rated material and content not suitable for viewers under the age of 14 without parental guidance. This indicates that a significant portion of Netflix's catalog caters to older viewers and may contain themes, language, or scenes that are more suitable for adult audiences.

    dtype='object')
```

## 15 Best time to update Movies

```
[ ]: mm=Movies.groupby(Movies['date_added'].dt.strftime('%B'))[['show_id']].  
      ↪nunique().reset_index().sort_values(by='show_id',ascending=False)  
mm
```

```
[ ]:      date_added  show_id  
5      July      565  
0      April      550  
2      December    547  
4      January     546  
10     October     545  
7      March       529  
1      August      519  
11     September    519  
9      November    498  
6      June        492  
8      May         439  
3      February    382
```

Observation:

July appears to be the optimal month for releasing movies on Netflix, based on observed trends or data analysis.

```
[ ]: Movies.groupby(['day_name'])[['show_id']].nunique().reset_index().  
      ↪sort_values(by='show_id',ascending=False)
```

```
[ ]:      day_name  show_id  
0      Friday    1566  
4      Thursday  1053  
6      Wednesday  906  
5      Tuesday   852  
1      Monday    628  
3      Sunday    569  
2      Saturday  557
```

Observation:

Friday emerges as the preferred day for Netflix to introduce new movies into its catalogue, potentially reflecting strategic scheduling to coincide with peak viewing periods over the weekend.

## 16 Best time to Update TV\_Shows

```
[ ]: TV_Show['day_added']=TV_Show['date_added'].dt.day  
TV_Show['month_added']=TV_Show['date_added'].dt.month  
TV_Show['year_added']=TV_Show['date_added'].dt.year
```

```
[ ]: TV_Show.groupby(TV_Show['date_added'].dt.strftime('%B'))[['show_id']].nunique().
      ↪reset_index().sort_values(by='show_id',ascending=False)
```

```
[ ]:  date_added  show_id
5      July      254
2    December      250
11   September      246
6      June       232
1     August       230
10   October       210
0     April        209
7     March        205
9    November      199
8      May         187
4    January       181
3    February      175
```

Observation:

July and December emerges as the optimal month for introducing new TV shows on Netflix, based on observed patterns.

```
[ ]: TV_Show.groupby(TV_Show['date_added'].dt.strftime('%A'))['show_id'].nunique().
      ↪reset_index().sort_values(by='show_id',ascending=False)
```

```
[ ]:  date_added  show_id
0    Friday      910
6  Wednesday      370
4  Thursday      334
5   Tuesday      330
2   Saturday      246
1    Monday      217
3    Sunday      171
```

Observation:

Friday emerges as the preferred day for Netflix to introduce new TV Shows into its catalogue, potentially reflecting strategic scheduling to coincide with peak viewing periods over the weekend.

```
[ ]: Movies[['dur','n']]=Movies['duration'].str.split(" ",expand=True)
```

```
[ ]: Movies['dur']=Movies['dur'].astype(int)
```

```
[ ]: plt.figure(figsize=(6,4))
      sns.boxplot(data=Movies['dur'])
      plt.title('Movies Duration')
      plt.show()
```

Observation:

The median duration of movies on Netflix is 100 minutes. This indicates that half of the movies available on the platform have a duration of 100 minutes or less, while the other half have a duration of 100 minutes or more.

```
[ ]: TV_Show[['dur', 'n']] = TV_Show['duration'].str.split(" ", expand=True)
```

```
[ ]: TV_Show['dur'] = TV_Show['dur'].astype(int)
```

```
[ ]: TV_Show['dur'].value_counts()
```

```
[ ]: dur
1      35035
2       9559

```

## 18 Insights

- Netflix prioritizes the addition of movies over TV shows.
- Mature content, suitable for audiences aged 14 and 17 and above, constitutes a significant portion of the movie ratings added to Netflix.
- The majority of movies available on Netflix were released between approximately 2008 and 2022, while TV shows primarily span from around 2012 to 2022.
- The United States emerges as the leading producer of both movies and TV shows on Netflix.
- International movies and dramas are prevalent among the content added to Netflix.
- Similarly, international TV shows and dramas dominate the selection of TV shows added to Netflix.
- July and Fridays are the preferred times for adding movies to Netflix, while December and Fridays are favored for adding TV shows. About half of the movies available on Netflix have durations ranging from 90 to 110 minutes.
- Over time, there is a trend of decreasing movie durations in the Netflix catalog

## 19 Recommendations:

- To optimize audience engagement, Netflix should prioritize acquiring and promoting movies, considering their higher release frequency compared to TV shows.
- With a considerable portion of adult-rated movies targeting audiences above the ages of 14

and 17, Netflix can strategically focus on curating and highlighting adult-oriented content to appeal to its target demographic.

- Netflix's emphasis on acquiring and showcasing international movies and dramas aligns with the platform's popularity among diverse global audiences, indicating the importance of continued investment in sourcing content from various countries.
- The preference for movie durations falling within the 90 to 110-minute range suggests a growing user preference for shorter film formats, suggesting an opportunity for Netflix to prioritize acquiring and promoting content that aligns with this trend.
- By strategically scheduling new movie releases primarily in July, particularly on Fridays, Netflix can maximize viewership and capitalize on peak engagement periods.
- Similarly, focusing on adding new TV shows in December, particularly on Fridays, can enhance viewership and capitalize on heightened user activity during the holiday season.
